FAA Aviation Safety Program

Aviation Safety-Education Seminar

www.faa.gov/fsdo/stlfsdo

DOWNTOWN PARKS AIRPORT, CAHOKIA, IL MIDCOAST AVIATION TERMINAL

WEDNESDAY OCTOBER 24, 2001 – 12:00 TO 2:00 P.M. AND 7:00 TO 9:00 P.M.

PROGRAM

SURVIVING ON THE DOWNTOWN PARKS AIRPORT

An aircraft on the ground is not in its natural element. Graceful wings, turbine engines, and spinning rotors and propellers are designed for flight. Moving around on the surface of an airport can be a dangerous place. The most tragic accident in aviation history occurred when two aircraft ran into each other on the ground.

Users of the St. Louis Downtown Parks Airport are encouraged to attend this seminar at which personnel from Bi-State and the FAA will discuss airport safety, air traffic control issues, and planned capital improvements at the Downtown Airport.

This program is being presented twice; to facilitate individual's who are unable to attend an evening meeting. There is no charge to attend the seminar and reservations are not required.

This seminar qualifies for the safety meeting requirement to participate in the FAA Pilot Proficiency Program - WINGS. Pilots who successfully qualify for a phase of Wings, need not accomplish a flight review (BFR). For additional information, contact the St. Louis Flight Standards District Office, 800-322-8876, extension 4830.
